

## **Free Waste Polythene Collection**

For our '**Free Waste Polythene Collection**' service the most important element for us is proper segregation of the waste into the following types.  
(If you need an extra bag/s to enable this we are happy to supply them).

### **What we love and want.**

1. LDPE natural(clear/unprinted).
2. LDPE jazz (coloured/printed).
3. LLDPE clear shrink film.
4. LLDPE jazz shrink film.

These materials should be marked with the  with a **4** in the middle to denote that they are LDPE or LLDPE, these four items above should not be mixed.

### **We can also accept.**

- LDPE bubble wrap is fine providing it isn't more than 10% of any bag or bale.
- Low tack LDPE protection film is also okay.

### **What we don't want!**

- Strapping.
- Labels.
- Paper.
- Card.
- Tape.
- Dirty or Wet waste.
- General waste of any kind.
- Bioplastics / Biomaterials marked as PLA or Cellulose.

### **Having any of the above in the waste negates the recyclability, making it useless!**

With several bags and bales of waste to handle daily we are unable to go through each one, we are therefore reliant on you the customer to ensure the policing of the waste segregation for us – we are confident it will become second nature very quickly.

If you have any questions or if you wish to discuss any materials that you may be unsure of, please don't hesitate to get in touch.

Kind regards  
Poly Solutions
